

# Fixawy

Fixawy is a free and open website written in PHP and distributed under the GNU General Public License.

Fixawy helps users find the best technician suitable for their problem, by giving them previous feedbacks about him/her from other previous clients.

Fixawy provides all maintenance services (Plumbing works - Electricity - Carpentry - Air Conditioning - Gypsum Board - Aluminium Works - Tiling Works - Painting Works) with the cooperation with specialize craftsmen across Egypt.

Fixawy was originally developed by **Khaled Gamal** who is now Chief Executive Officer -CEO- of Fixawy to help both of technician and customers to get to their needs.

Clients of Fixawy are asked to make their own free accounts to make it easy to communicate with technician also Fixawy helps its Clients by classifying its services into some categories and also for simplicity the developers of the website made a label in the website interface called **categories** to make it easy to be reached for Clients.

Also Fixawy help Clients by providing them with the reviews of technicians to make it easy for them to choose the suitable technicians for the problem.

At the end of the process Clients are asked to leave their feedback about the technicians , they asked to leave a comment and a rate about technicians commitment and about the quality of the work done and also to leave an overall rate.

Here is some features of Fixawy are listed in details.

## 1. Professional Fixers

Fixawy doesn't accept any fixer except the ones who passes Fixawy interviews, quality assurance and safety. Every fixer on Fixawy has a file includes a copy of national ID and clean criminal record.

## 2. Pricing System

Fixawy had make it comfort instead of exhausting price negotiation after every process, As after the job done the system sends a message with the process price.

## 3. Fixer Rating

The system gives you an opportunity to make a review on the fixer after your job done so that the fixer could enhance his services.

#### 4. Calculate your needs

If you are willing to finish your apartment, you will find a calculator that helps you to calculate your materials needs like Floors, Paint, Bricks and Cement.

Clients of Fixawy are not suffering from the problem of prices as Fixawy provides them with a fixed pricing system which we will discuss in details .

The system of pricing for light maintenances (less than 3 working hours for plumbing, carpentry and electricity) is calculated by the point system, the cost of one quarter hour in the first hour by one point and the second hour by only two points so as to ensure that the technician does not benefit from exaggeration in working time.

Also there are some points can be added in case of special work or dangerous work.

Any work takes more than three hours pricing system will not estimate its cost and it will be estimated by the client and the technician .
